(24 pts.) 1. Circle all of the following that are true:
   (a) The names of classes are usually nouns while the names of interfaces are usually adjectives. **True**
   (b) An anonymous class can't have a constructor. **True** What name would you use?
   (c) An anonymous class can define static methods. **False** How would you call the static method since static methods need a class name?
   (d) An inner class has access to private instance variables from its enclosing class. **True**
   (e) Parent components are drawn before their children. **True**
   (f) Custom drawing in a component is done inside the overridden paintComponent method. **True. You should do custom drawing in paintComponent, not in paint.**
