Course Policy

Logistics The course requires attendance at the lecture. The Teaching Assistant for the course is
Mr. David Lisuk (dlisuk@eng.ucsd.edu). Messrs. Devon Merrill (djmerril@ucsd.edu), Ninad
More (nmore@ucsd.edu) and Andy Kang (a7kang@ucsd.edu) are tutors for this course. We
will be providing a moodle discussion board for possible logistical questions you may have
regarding this course as well. It is best to discuss technical issues at the office hours of course
as communication can thus be speeded up.

Discussion Section Attendance at the discussion sessions scheduled on Tuesdays 6:30 – 7:50
PM at CENTR 105 and conducted by Mr. David Lisuk is mandatory. The discussion
section will cover a) solutions to homework problems, b) solutions to the test problems, c)
additional course material, d) workshop problems and/or e) a brief review of the material
covered during the week. When necessary, discussion sections will be used to deliver for-
mal lectures as well. For example, the discussion sections on January 7 will cover lecture
material.

Tests There will be three tests given in this course. The first two tests will be given in class, and
will take place on January 29 and February 26. The final will take place at the scheduled
time, Monday, March 17, 7:00 to 10:00 PM. Each midterm will contribute 20% of your grade,
while the final will contribute 40% to your final grade. The final exam will be cumulative and
will test all the material covered during the course. Additionally, a number of unannounced
quizzes will take place during lectures and discussion sections. Your lowest score will be
dropped with the remaining quizzes contributing equally to a 10% portion of your grade.
There will be no make-up tests given for any reason. To get credit for an exam or quiz,
attendance during the time period that it is given in is required. All tests will be conducted
on a closed-books and closed-notes basis.

Homeworks On January 13, February 10 and March 3, a homework set will be assigned, com-
posed of two classes of problems. The first class of problems will be practice problems that
will enable you to exercise your understanding of the course material. The second class of
problems will be deeper and more challenging to help you prepare more thoroughly for the
midterms and the finals. Only the second class of problems which will be so indicated in
the homework handouts will be collected and graded. You will need to do of course all the
problems assigned, as the first class will provide you with practice to enable you to think more
deeply about the more challenging problems. Homeworks will be due on the day indicated
at 4:00 PM; you need to turn in your solutions for the homeworks to be graded electronically
through moodle by the deadline. Any homeworks turned in after the deadline will receive no credit. Your graded homeworks will contribute equally to a 10% portion of your grade.

**Homework Due Dates** Homeworks will be due at 4:00 PM on January 28, February 25, and March 14. No late homeworks will be accepted. Any late homeworks will not be graded and will receive a grade of zero. Homework solutions will be subsequently made available during discussion sections; you can further discuss the solutions during office hours, so that you can check your solutions.

**Homework Teams** You can work and submit your homeworks in groups of two. You can of course discuss and work together with your homework teammate. No other collaborative work with any other student in the class is possible. It is our expectation that each group’s homework reflects the work of that group only and nobody else’s; any indication to the contrary will constitute a violation of the UCSD Policy on Integrity of Scholarship and will be seriously prosecuted.

**Regrade Policy** Sometimes you get a grade that you don’t like, either because we added up the points wrong or because you think we evaluated you wrongly. If you believe that a regrade is needed, please inform us immediately by providing a written description of the reason why a regrade is necessary. In case of a regrade, your whole test will be regraded, possibly resulting in a lower total score. If no regrade is requested within one week, the following Statute of Limitations will apply:

You have one week from the day any particular graded exam or homework is made available to you to appeal the grade you received. After one week, we will assume that you believe the grade that you got is the correct one. After one week, grades are unchangeable, fixed and permanent.
