CSE 197 is offered by UCSD to augment students’ internship experiences and to allow students to earn academic credit. The course is designed to identify and deepen the connections between UCSD coursework and real world problems. Students reflect on the development of their professional, problem-solving, and technical skills throughout their internships.

Students require the permission of their internship supervisor to participate in CSE 197. The course activities will include:

- Weekly written reflections on the student’s work, to be shared with peers.
- A final written poster board highlighting a key achievement in the internship.

Your signature above indicates your consent for the student’s participation in CSE 197, under your supervision.

We are sensitive to the needs of companies to keep proprietary or private information confidential. Students are required to consult their supervisors about any relevant disclosure rules and safeguards. If you have concerns or special requirements that will impact this student’s participation in CSE 197, please contact me as soon as possible at minnes@eng.ucsd.edu.

We invite you to join us at UCSD on Wednesday October 8, 2014 for the Summer Internship Symposium where the participating students will present their summer accomplishments. More details will be forthcoming.

Sincerely,

Prof. Mia Minnes  minnes@eng.ucsd.edu
