Did you know that...
...Google has released well over 25 million lines of code as open source?
...since 2003, Google has answered 450 billion new unique search queries?
...in Chrome, a task that took a minute to complete in JavaScript a year ago now happens in less than a second?
...UCSD alums have been major contributors to these achievements?

We have enormous goals to accomplish and we need great people to help us keep achieving such incredible feats! We look forward to seeing you at one or more of the following events this fall.

If you are interested in full-time and intern opportunities with Google, we encourage you to apply today to be considered for on-campus interviews at UCSD this Fall. If you have questions about any of our opportunities, please feel free to contact Jessica Lulovics at jluls@google.com or on Google+! We look forward to meeting you!

**October 18 - Tech Talk: Life on the Chrome Team**

5:30pm, CSE 1202  
RSVP: [http://goo.gl/26JA3](http://goo.gl/26JA3)  
Title: Life on Chrome team - a tale of hard engineering problems  
Speaker: Ian Fette, Senior Product Manager, Google Chrome

It's 2008, and you plug in your computer in your freshman dorm room, intent on exploring the power of a university network connection. You're browsing the web, and all of a sudden windows with creepy porn start popping up, your bank calls your cell phone to inform you about fraudulent activity, and then to top it off you get a blue screen of death. Your roommate starts muttering curse words you've never heard before because his whole browser just crashed, and he lost all his work. We've all had browsers disappoint us in our life, but what's it like to be able to actually fix those problems? What sorts of engineering challenges are involved in building a better browser for hundreds of millions of users, and what's it like working on a team at Google to overcome these challenges? Come and find out!

**Speaker bio:** Ian joined the Google Chrome team as a product manager in 2007, focused on security, browser infrastructure, and the team's implementation and development of new web standards. Prior to joining Google, Ian worked for the U.S. Government. Ian has degrees in Computer Science from the University of Michigan and Carnegie Mellon University.

**October 20 - Google Office Hours**

10:00am - 3:00pm, CSE Building  
RSVP: [http://goo.gl/7z82k](http://goo.gl/7z82k)  
Please sign up for 1 on 1 time with a Google engineer or recruiter. Come with your resume or just to chat about Google and our opportunities. Appointments will be assigned on a first come, first served basis. We will confirm appointments with students via e-mail.

**October 20 - Resume & Interview Workshop**

4:00pm, Qualcomm Conference Center (Jacobs Hall, EBU I)  
RSVP: [http://goo.gl/26JA3](http://goo.gl/26JA3)  
Looking for a little help with your resume and some advice on how to succeed in a technical interview? This resume and interview workshop is geared towards students who are preparing for the technical job search. The workshop will begin with about 30 minutes of presentation on resume writing and interview prep. Following this we will provide one or two sample interview questions and break the audience into small groups to go through the questions as they would in an actual interview.
