

Tech Talk: Rolf Schreiber '85

**Google.org
RechargeIT Initiative**

CSE 1202

April 15, 2009

5:00—7:00 pm

RechargeIT is a Google.org initiative that aims to reduce CO2 emissions, cut oil use, and stabilize the electrical grid by accelerating the adoption of plug-in electric vehicles. Our vision is that one day thousands of cars will be plugging into a greener grid.

Rolf Schreiber is an engineer with RechargeIT. Though he has a long professional career in computer systems and network management starting as an undergrad at UC San Diego, he's had a lifelong passion for automobiles and is thrilled to have a dream job at Google working on plug-in vehicle technologies.
