CSE141

Homework Policy

- Homework problems will be posted on the class web site, every week before class. You are responsible for downloading and solving them.
- Homework solutions are not to be handed in for grading.
- Homework problem sets are simply a mechanism to make you learn by “doing”.
- Working these problems in groups is strongly encouraged. However simply obtaining the answers from someone who has already solved the problems (passive intake) will lead to an absence of learning.
- To enforce the “doing”, we will have pop-quizzes in the class.
- Pop-quizzes will be about 15-30 minutes long, and will be based almost solely on the homework problems. Complexity on these quizzes could range from a repetition of a homework problem, to a “think out of the box” problem.
- Quizzes will be graded and returned to you at the end of the next class.
- It is acceptable (and recommended) to use TA office hours for homework questions.
- Solutions to the homework problem sets will also be available in soft-reserve at least 2 days before the next class. (Tuesday).
