The Writing Process

Writing entails multiple tasks that do not have to occur in sequential order.

Initial Reading/Notes	Re-reading for Ideas/Gaps	Brainstorming Ideas	Data Generation	Integrating Data and/or Sources
Re-reading for Quotes/References	Jigsaw Planning (pieces only)	Data Analysis	Outlining Ideas	Clarifying Arguments
Mapping Ideas	Data Re-analysis	**Generating Words/Content**	Connecting the Pieces	Reading the Draft
Making a Writing Task List	Outlining Organization	Clarifying Words and Sentences	Reverse Outlining the Draft	Fine-Tuning Sentences
Clarifying Organization	Cutting Extraneous Material	Proof-reading the Draft	Bibliographic Material	Formatting the Document

Be intentional. Concentrate on one stage until you *decide* to shift to another.
